Minor in Data Visualization

Stevens Institute of Technology, Hoboken, NJ   Expected 05/2027

SKILLS

Languages: Python, Java, C++, Scheme, C, Assembly

Web Development: HTML, CSS

Source Code Management: Visual Studio Code, Git, Bash, Docker

Design Tools: Blender, Adobe Photoshop, Source Filmmaker, KiCad

PROJECTS

QuackTask | Stevens Institute of Technology   February 2025 – March 2025

- Built a public Chrome extension to sync Canvas assignments with Google Tasks for Stevens students. Implemented persistent authentication, duplicate prevention, and a lightweight, user-friendly interface.

SpotiSync | Stevens Institute of Technology   December 2024 – April 2025

- Designed a browser-based tool for converting YouTube audio to MP3 and importing it directly into Spotify user playlists. Utilized ffmpeg.wasm to enable seamless, in-browser audio processing with no external dependencies.

KeyScraper | Stevens Institute of Technology   October 2024 – November 2024

- Developed a web scraping tool for custom keyboard forums, enabling automated downloading and structured organization of HTML content. Implemented keyword-based parsing to extract and return targeted result links.

EventBuddy | Stevens Institute of Technology   November 24 – December 24

- Engineered a Discord bot for advanced event scheduling, supporting complex user commands. Integrated calendar and time libraries to enable seamless event creation and real-time editing.

EXPERIENCE

CVS Pharmacy | Bernardsville, NJ

Front Store Associate   February 2021 – August 2024

- Provided exceptional customer service, effectively addressing inquiries and resolving issues to ensure a positive shopping experience.
